

# DENİZ ÖZDEMİR

[heydeniz@proton.me](mailto:heydeniz@proton.me) | [linkedin.com/in/denizoezdemir](https://linkedin.com/in/denizoezdemir) | [github.com/deniz-oezdemir](https://github.com/deniz-oezdemir) | [deniz.fyi](https://deniz.fyi)

I am a motivated software developer, changing careers from product management in consumer investing. With a strong foundation in C/C++, I enjoy learning new technologies and am eager to dive into all aspects of development.

## TECHNICAL SKILLS

---

<b>Programming Languages</b>	C, C++, Go, Python, JavaScript, HTML, CSS, SQL
<b>Development Tools</b>	Git, Docker, Bash, Vim, VS Code, Jira, Confluence, Figma

## PROJECTS

---

- **Pong App:** Currently building a full-stack Pong game that will feature a microservices architecture, real-time multiplayer functionality, game statistics, and an AI opponent.
- **Web Server:** Developed a lightweight HTTP server in C++98, inspired by Nginx, compliant with the HTTP/1.1 standard. Features configuration files, CGI support, request parsing, and response generation, with support for GET, POST, and DELETE requests. Implemented unit test for all critical components.
- **Ray Tracer:** Implemented a ray tracer to render 3D images from numerical scenes using test-driven development.
- **Minishell:** Built a custom Unix-like shell in C, emulating Bash functionality with support for command execution, built-ins, piping, redirection, and signal handling.
- **Philosophers:** Simulated the dining philosophers problem with multithreading in C. Also reimplemented in Go.

## EXPERIENCE

---

<b>Deutsche Kreditbank AG</b>	Berlin, Germany
<i>Product Manager, Retail Clients – Securities and Savings</i>	10/2022 - Present
<i>Trainee, Banking Transformation</i>	10/2021 - 09/2022

- Led cross-functional collaboration by creating detailed user stories, prioritizing development tasks, and facilitating communication between legal, design, engineering, QA, and marketing teams. Drove the development of key features for a new brokerage software, ensuring alignment and timely delivery.
- Simplified complex regulatory frameworks by translating them into clear technical specifications. Partnered with an adjacent team to deliver a self-disclosure product, ensuring full compliance with financial regulations.
- Improved search functionality for a consumer investment portal by coordinating efforts between external providers and in-house development. Enhanced the user experience, leading to increased satisfaction and engagement.

<b>Capgemini SE</b>	Munich, Germany
<i>Intern, Management Consulting – Business Data Strategy</i>	08/2020 - 10/2020

<b>SAP SE</b>	Walldorf, Germany
<i>Working Student, Customer Success – Project Management</i>	08/2019 - 04/2020

<b>Mitsubishi Fuso Truck and Bus Corporation</b>	Tokyo, Japan
<i>Intern, Cost Controlling – Business Technology Analyst</i>	10/2017 - 02/2018

## EDUCATION

---

<b>42 Berlin</b>	Berlin, Germany
<i>Software Engineering</i>	11/2023 - Present

- Built functional applications in a project-based learning environment that emphasizes self-directed problem-solving, peer-to-peer learning, and team collaboration in software development.
- Completed 87% of the core curriculum, gaining expertise in imperative and object-oriented programming while acquiring practical experience in algorithms, graphics, networking, system administration, and web development.

<b>University of Mannheim</b>	Mannheim, Germany
<i>MS, Finance and Information Systems</i>	09/2018 - 06/2021

<b>Humboldt University of Berlin</b>	Berlin, Germany
<i>BS, Economics</i>	10/2013 - 10/2017

## FURTHER COMPETENCIES

---

<b>Languages</b>	English (Full Professional), German (Native), Turkish (Intermediate), Italian (Elementary)
<b>Credentials</b>	AWS Compute, Storage, Databases, and Serverless (AWS Educate), CSPO (Scrum Alliance)
