

DENİZ ÖZDEMİR

heydeniz@proton.me | linkedin.com/in/denizoezdemir | github.com/deniz-oezdemir | deniz.fyi

I am a motivated software developer transitioning from a career in product management. With a strong foundation in C/C++, I enjoy learning new technologies and am eager to create efficient, reliable and scalable software systems.

TECHNICAL SKILLS

Programming Languages	C, C++, Go, Python, JavaScript/TypeScript, SQL (Postgres)
Frameworks / Libraries	Django, FastAPI, HuggingFace, Bootstrap, WordPress
Development Tools	Git, Docker, Bash, Vim, VS Code, Jira, Confluence, Figma, DigitalOcean

PROJECTS

- Web Server: Developed an HTTP/1.1 compliant web server in C++98 with API endpoints, configuration management, CGI support, and unit testing. Implemented non-blocking I/O with poll for efficient request handling.
- Pong Web App: Built a full-stack 3D game with a microservices architecture. Implemented RESTful backend APIs with database integration and containerized deployment with Docker. It features real-time multiplayer functionality, an AI opponent, and cross-device compatibility.
- Ray Tracer: Implemented a ray tracer to render 3D images with multiple objects using test-driven development.
- Minishell: Built a custom Unix-like shell in C, emulating Bash functionality with support for command execution, built-ins, piping, redirection, and signal handling.
- Philosophers: Simulated the dining philosophers problem with multithreading in C. Also reimplemented in Go.

EXPERIENCE

Deutsche Kreditbank AG	Berlin, Germany
<i>Product Manager, Retail Clients – Securities and Savings</i>	10/2022 - Present
<i>Trainee, Banking Transformation</i>	10/2021 - 09/2022
• Supported the development of key brokerage software features by crafting detailed requirement specifications and facilitating cross-functional collaboration among legal, design, data, engineering, and marketing teams.	
Capgemini SE	Munich, Germany
<i>Intern, Management Consulting – Business Data Strategy</i>	08/2020 - 10/2020
• Delivered data-driven solutions for clients in the automotive, pharmaceutical and financial industries.	
SAP SE	Walldorf, Germany
<i>Working Student, Customer Engagement Innovation Delivery – Product Management</i>	08/2019 - 04/2020
• Streamlined operating processes with Signavio, creating the foundation for a new cloud-native product.	
Mitsubishi Fuso Truck and Bus Corporation	Tokyo, Japan
<i>Intern, Cost Controlling – Business Technology Analyst</i>	10/2017 - 02/2018
• Drove the development of a reporting tool on SAP BW architecture by ensuring stakeholder buy-in.	

EDUCATION

42 Berlin	Berlin, Germany
<i>Software Engineering</i>	11/2023 - 02/2025
• Gained hands-on experience in algorithms, graphics, networking, system administration, and web development. Completed the course in 15 months while working part-time, 3 months faster than the average full-time student.	
University of Mannheim	Mannheim, Germany
<i>MS, Finance and Information Systems</i>	09/2018 - 06/2021
• Relevant Coursework: Human-Computer Interaction, Predictive Analytics	
Humboldt University of Berlin	Berlin, Germany
<i>BS, Economics</i>	10/2013 - 10/2017
• Relevant Coursework: Business Informatics, Statistical Programming	

FURTHER COMPETENCIES

Languages	English (Full Professional), German (Native), Turkish (Intermediate), Italian (Elementary)
Credentials	AWS Compute, Storage, Databases, and Serverless (AWS Educate), CSPO (Scrum Alliance)
