

DENİZ ÖZDEMİR

heydeniz@proton.me | linkedin.com/in/denizoezdemir | github.com/deniz-oezdemir | deniz.fyi

I am a motivated software developer, changing careers from product management in consumer investing. Equipped with a strong foundation in C/C++, I enjoy learning new technologies and am eager to dive into all aspects of development.

TECHNICAL SKILLS

Programming Languages	C, C++, Go, Python, JavaScript, HTML, CSS, SQL
Development Tools	Git, Docker, Bash, Vim, VS Code, Jira, Confluence, Figma

PROJECTS

- **Pong Web App:** Currently building a full-stack 3D Pong game with a microservices architecture. It will feature real-time multiplayer functionality, an AI opponent, game statistics, and cross-device compatibility.
- **Web Server:** Developed an HTTP/1.1 compliant web server in C++98 with configuration management, CGI support, and comprehensive unit testing. Implemented non-blocking I/O with poll.
- **Ray Tracer:** Implemented a ray tracer to render 3D images with multiple objects using test-driven development.
- **Minishell:** Built a custom Unix-like shell in C, emulating Bash functionality with support for command execution, built-ins, piping, redirection, and signal handling.
- **Philosophers:** Simulated the dining philosophers problem with multithreading in C. Also reimplemented in Go.

EXPERIENCE

Deutsche Kreditbank AG	Berlin, Germany
<i>Product Manager, Retail Clients – Securities and Savings</i>	10/2022 - Present
<i>Trainee, Banking Transformation</i>	10/2021 - 09/2022

- Led cross-functional collaboration by creating detailed user stories, prioritizing development tasks, and facilitating communication between legal, design, engineering, QA, and marketing teams. Drove the development of key features for a new brokerage software, ensuring alignment and timely delivery.
- Simplified complex regulatory frameworks by translating them into clear technical specifications. Partnered with an adjacent team to deliver a self-disclosure product, ensuring full compliance with financial regulations.
- Improved search functionality for a consumer investment portal by coordinating efforts between external providers and in-house development. Enhanced the user experience, leading to increased satisfaction and engagement.

Capgemini SE	Munich, Germany
<i>Intern, Management Consulting – Business Data Strategy</i>	08/2020 - 10/2020
SAP SE	Walldorf, Germany
<i>Working Student, Customer Success – Project Management</i>	08/2019 - 04/2020
Mitsubishi Fuso Truck and Bus Corporation	Tokyo, Japan
<i>Intern, Cost Controlling – Business Technology Analyst</i>	10/2017 - 02/2018

EDUCATION

42 Berlin	Berlin, Germany
<i>Software Engineering</i>	11/2023 - Present

- Built functional applications in a project-based learning environment that emphasizes self-directed problem-solving, peer-to-peer learning, and team collaboration in software development.
- Completed 87% of the core curriculum, gaining expertise in imperative and object-oriented programming while acquiring practical experience in algorithms, graphics, networking, system administration, and web development.

University of Mannheim	Mannheim, Germany
<i>MS, Finance and Information Systems</i>	09/2018 - 06/2021

Humboldt University of Berlin	Berlin, Germany
<i>BS, Economics</i>	10/2013 - 10/2017

FURTHER COMPETENCIES

Languages	English (Full Professional), German (Native), Turkish (Intermediate), Italian (Elementary)
Credentials	AWS Compute, Storage, Databases, and Serverless (AWS Educate), CSPO (Scrum Alliance)
